

APRESENTAÇÃO INSTITUCIONAL

QUEM SOMOS?

A HYPE é uma **integradora de TI** criada para atender com agilidade, foco e extrema competência técnica as demandas tecnológicas de nossos clientes.

Nosso foco é **desenhar e implementar soluções** que entreguem performance, alta disponibilidade e confiabilidade para os Datacenters e redes de dados das empresas.

Buscamos ser o parceiro que garanta que os dados de nossos clientes estejam corretamente armazenados, em Datacenters próprios, nuvens públicas, privadas ou híbridas, e sejam disponibilizados a seus usuários com segurança e alta performance. **Visamos construir projetos que equilibrem corretamente custo-benefício e entreguem alto valor agregado.**

Nosso compromisso é focar sempre em parcerias de longo prazo, de forma que sejamos reconhecidos como *trusted advisors* por nossos clientes.

MISSÃO

Garantir que nossos clientes usem ferramentas tecnológicas em sua plenitude, corretamente dimensionadas e implementadas.

Equilibrar custos, benefícios e competência, agregando valor ao seus negócios e gerando confiança mútua entre nossas empresas.

VISÃO

Ser reconhecida por nossos clientes, parceiros e pelo mercado **como uma integradora referência** no desenho e implementação de projetos de infraestrutura de Datacenter e redes de dados.

ZTNA (ZERO TRUST NETWORK ACCESS) ACESSO SEGURO SEM VPN

60% of enterprises will phase out most of their VPNs for a ZTNA by 2023.

78% of organizations use more than 50 different cybersecurity tools.

This can equate to massive time and cost savings.

THREATWISE

ARMADILHAS PARA IDENTIFICAR E INTERROMPER ATAQUES ANTES DE SUA ATIVAÇÃO

Metallic® ThreatWise™

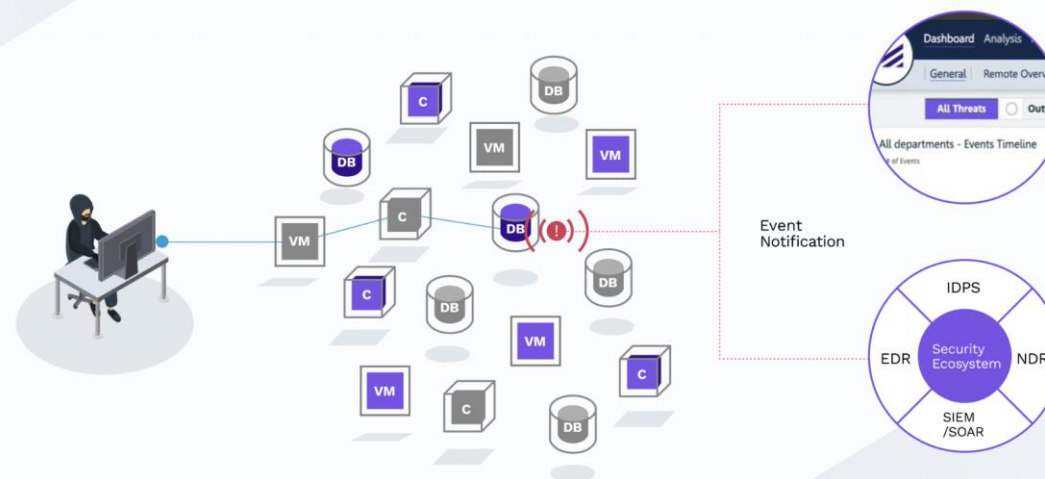

Data protection starts before
you're compromised

Actively defend your data with fully-integrated cyber deception. Uncover, contain, and minimize threats the moment an attack begins.

Contain threats before leakage, exfiltration, or damage.

ThreatWise patented deception technology

✓ Imitate real assets with highly intelligent threat sensor

✓ Divert bad actors into engaging false resources

✓ Immediately flag malicious activity and ransomware attempts

✓ Accelerate remediation with security tool integration

STREAMLINE OPERATIONS

- DELIVER VALUE FASTER, RELIABLY
- REDUCE RISK AND LOWER IT COSTS
- MANAGE WITH A SINGLE OPERATIONS TEAM

START FLEXIBLE, STAY FLEXIBLE

- PURCHASE ONLY WHAT IS REQUIRED
- INDEPENDENTLY SCALE COMPONENTS AS NEEDED
- REFRESH COMPUTE AND STORAGE DISCRETELY

CONFIDENTLY BUILD PRIVATE CLOUDS

- MEET SLAS FOR ANY WORKLOAD, SIMPLY
- VIRTUALLY ELIMINATE PLANNED DOWNTIME
- INTEGRATE WITH LEADING CLOUD PLATFORMS

ARCHITECT WITHOUT COMPROMISE

- DELIVER BEST OF BREED COMPONENTS
- DEPLOY PRE-TESTED & VALIDATED SOLUTIONS
- ALWAYS STAY MODERN

SAP HANA NATIVE STORAGE EXTENSION

DATA TEMPERATURE

A multi-temperature data-management solution involves three types of data.

Hot Data

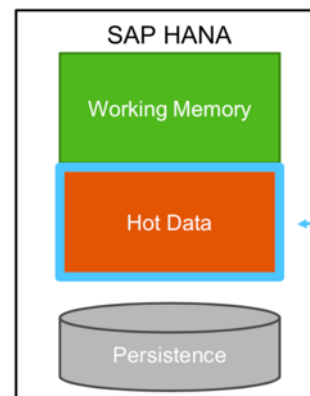

Data that is frequently accessed from fast storage.

Warm Data

Data that is less-frequently accessed and stored on slightly slower or external storage.

Cold Data

Data that is rarely accessed and stored on the slowest storage that an organization has.
